

PAUSE FOR PAWS

Pets that Need Adoption:

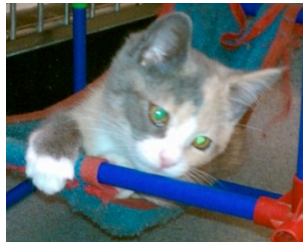

BARNEY – His owners were moving and could not take him with them. They brought him to Riverside to have him euthanized, but the staff saved his life and he has been living with us ever since.

SUGAR – He was found when he was 6 months of age and had been hit by a car and abandoned by his owners. His front leg was broken, so the doctors at Riverside surgically repaired it. He has been living with us since then, and served as a blood donor, saving the lives of others, for quite a few years.

CARL – One of our clients found him as a puppy and could not keep him. He is young and playful, yet shy and submissive. He loves children and other dogs and is looking for a loving family to call his own.

MALE AND FEMALE KITTEN – A client found 4 feral kittens and brought them in to be cared for and adopted out. There were two males and two females, and they quickly warmed up to us and have become very sweet, social, and playful little kittens. Two of the kittens have found homes with loving families, so we have two left to be adopted: one very pretty little calico female and a sweet

little grey tabby male. They would love to find homes where they can run and play.

PAUSE FOR PAWS

PREACHER – He was found in a parking lot with a broken back and severe head wound. A staff member rescued him and the doctors found that he was paralyzed in his lower body, but after being properly cared for he is now able to walk on his own. He is unable to urinate on his own, but he would love to find the right family to love and properly care for him.

WHISKEY – He was dropped off at the back door of Riverside one winter night with his siblings, and he was the only kitten that survived. He has skin allergies and is on medication and a special diet, but he is quite the character and would fit in great with a family who could care for him properly.

SCOOTER – He has been living with us for quite some time. He has a medical issue that causes him to become constipated easily, so he is on medications to help him with this. He is a very sweet cat and has a very fun personality, and he would love to have a family to call his own.

LEO – He was abandoned at Riverside in 1999. He has permanent nasal damage from a chronic upper respiratory infection as a kitten, but he is a very loving and affectionate cat and would enjoy living with the perfect family.
